

## **Password Power 8**

### *The Missing Piece to the Password Management Puzzle*

#### **Notes ID Plug-in:**

Authenticate Notes users with the Active Directory password in real-time. Single Sign-On can be optionally enabled.

#### **Domino Plug-in:**

Authenticate users connecting to Domino via a browser with the Active Directory password in real-time. Support for Sametime & QuickPlace. Single Sign-On can be optionally enabled.

#### **Portal Plug-in:**

Provide single sign-on capabilities to Domino servers from a 3rd party portal login without the need to authenticate twice once for the portal and a second time for Domino access. (A 3rd party portal is any browser based application server such as BEA Weblogic, Plumtree, and WebSphere to name a few.)

#### **WebSphere Plug-in:**

Authenticate users with the Active Directory password in real-time enabling single sign-on through the browser to both WebSphere Application Server and WebSphere Portal.

#### **Sametime Connect Plug-in:**

Authenticate Sametime Connect users with the Active Directory in real-time.

#### **AS/400 Plug-in:**

Synchronization of user's iSeries account with the Active Directory.

#### **Oracle Plug-in:**

Synchronization of user's Oracle account with the Active Directory password.

#### **SAP Plug-in:**

Enable single sign-on to SAP R/3 client via authentication with the Active Directory password.

#### **Windows Plug-in:**

With Novell as the network logon, changing its password will update a Windows domain account password (NT or Active Directory).

#### **LDAP Plug-in:**

Synchronize any third party LDAP directory with your network access password. For example, if using Active Directory to login, this plug-in could be used to synchronize the user's Novell eDirectory or SunONE LDAP password.

#### **Web Set Password Plug-in:**

Enables users to securely manage and reset their own HTTP passwords directly from a web browser. Administrators can define numerous password preferences not found in Domino 7, including "Forgot Password?" and 3-strikes functionality. Completely customizable. Optional password synchronization available for Domino HTTP, Windows, Notes ID and LDAP passwords.
