ShareGate:

Manage, migrate & secure
SharePoint & Office 365

Management
Made Simple.

Sharegate Simplifies Your Important Projects & Tasks

Whether you use **SharePoint** or **Office 365**, or want to migrate to one of those environments, Sharegate is the right tool for you. SharePoint & Office 365 security is complex: with Sharegate you know who has access to what, what's shared externally and easily edit and manage user permissions. You have a complete understanding of Office 365 & SharePoint usage and identify potential security risks. You keep your SharePoint & Office 365 organized and simplify your day-to-day administration.

Migrate to Office 365

Easily migrate your existing content to Office 365: **structure**, **content**, **users**, **permissions** and **more**. With Sharegate, you can plan a seamless migration, make the move to the cloud, and ensure your users get the most out of the platform: file share, SharePoint, Google Drive, or even Office 365.

Secure your environment

SharePoint & Office 365 security is complex. Managing **thousands of users** and **hundreds of sites** with years of usage can be challenging. With out-of-the-box features, it's nearly impossible to get a clear picture of your current permissions and remain aligned with the evolution of your security needs.

Reorganize Content & Structure

Gain Full Visibility Over Your Environments and Make SharePoint Evolve With Your Business:

- **Reorganize** Content
- **Clean up** and **Archive**
- **Bulk Actions**

Migrate to SharePoint 2013 or 2016

Know what's in your SharePoint or File Share, view a list of all potential migration errors and estimate the effort required for your migration. Sharegate helps you successfully **plan** your project, **move** your content and **report** on your SharePoint migration.

Reports on security and usage

Gain insights far beyond what you can get with out-of-the-box SharePoint & Office 365 reports. Our reporting tool has **20+ built-in reports** to help you **take action**, enforce your governance policies and adopt industry best practices. Run or schedule reports to **gain a complete understanding** of Office 365 & SharePoint usage and identify potential risks.

Administrate Day-To-Day Requests

Save Time on SharePoint & Office 365 Administration: whether you're **on-premises**, in the **cloud** or in a **hybrid** environment, navigate your sites, schedule reports and take action on results from a single interface.
